INTRODUCTION

The 1989-90 Pennsylvania Public Library Statistics publication is compiled from information reported in the Public Library Annual Report for calendar year 1989 or fiscal year 1989-90 and is contained in Tables 1, 2, 3 & 4.

The publication is separated into two main categories of libraries. Parts I and II reflect the operations of libraries that participate in the State Aid to Public Libraries Program (State Aided Libraries) and Parts III and IV report data for libraries that do not participate in the State Aid Program (Non-State Aided Libraries). The combined total of State Aided and Non-State Aided Library data is given in the blocked section of Page 89. The data presented in charts and graphs reflects the combined statistics of State Aided and Non- State Aided libraries.

Libraries are organized by county and by the municipality in which the library is located. Where there is a system in place, the system headquarters is identified by an "H" preceding the library location. An "M" identifies system member libraries.

In general, column headings are self explanatory with two areas of note: In Table 3, the INCOME SCHOOL BOARD and INDIRECT FEDERAL AID figures are included in the TOTAL LOC GOV INC column. Also, the SALARIES WAGES AND BENEFITS figure represents all library employes including maintenance and security staff while FTE calculations exclude maintenance and security staff.

Reimbursement to libraries for participation in the ACCESS PENNSYLVANIA Statewide Card System is included in the State and Federal Income columns and in the State and Federal Expenditure columns as appropriate for each library.

The results and analysis of the 1989-90 Public Library Salary Survey will be included in a separate publication.

Part VIII compares the local tax money a library receives with the available tax base, and then to the population the library is required to serve. The first table compares the local government income received by a public library with the market value of real estate in the municipality or municipalities the library serves. Since most of the local tax dollars that go to support public libraries in Pennsylvania are derived from property taxes, this table gives some indication of how the municipality or municipalities support the library relative to the tax base available to them.

The second table in this section compares local tax income to population served. This table gives an indication of how well the municipality or municipalities support the library relative to the number of people for whom the library must provide resources and services.

The market value of taxable property used in the first table is established annually by the Pennsylvania Tax Equalization Board. The figure given is the total market value of all municipalities within the library's service area. Local government income is reported by the libraries in the Public Library Annual Report. Service area populations include all municipalities from which the library receives income.

Accuracy is essential to the value and usefulness of this publication. Your notes of emission and error are invited.
